WORK EXPERIENCE

Developer

Personal Porfolio

- Built a front end developer portfolio to display my assets, projects, and contact information in case needed to be contacted
- Showcase all my projects with either a live website for the project or a gallery of photos of what the project looks like. As well as have all project have access to the code on GitHub when needed
- Made website fully responsive to fit on all screens so it can be accessible throughout different devices

PROJECTS

Photo Library

Developer

- Utilize Firebase (NoSql) and all its features including firebase database, storage, and authentication.
- Create a responsive mobile to desktop friendly site that can be accessed through all devices
- Used Firebase to create an authenticated user to access their personal account which they can sign out, sign in, and even delete their account.
- Used Firebase storage to store all of the users images in their personal account.
- Used firebase database to keep track of all the users data such as images uploaded.

Javier Car Wash

Developer

- Built a fully responsive website for different screen sizes
- Displays all information needed such as prices, location, and contact information if needed by end user
- Use JavaScript, HTML/CSS, React, as well as a third party API to display the map

Recipe Book

Developer

CAREER OBJECTIVE

I've been interested in code since I was young. It was one of my main interests. I started studying it seriously in my 3rd year of high school. I graduated from high school and have studied code for some time now. I'm determined, open-minded, and aspiring to be better. I'm ready to stay in this industry for a long time. I'm ready to grow so I'm looking for a job to grow my skills, knowledge, network, and overall make me better than what I was yesterday.

EDUCATION

High School Diploma

Royal High School

📅 2017 - 2021

📍 Simi Valley, CA

SKILLS

JavaScript

HTML/ CSS

React

Git/Github

Responsive design

Firebase (NoSql)

- Created a virtual recipe book which recipes can be changed, added, deleted, and searched
- User can save the recipes in local storage and come back to the recipes when they are needed
- Responsive to work for different screen sizes
- Used: JavaScript, HTML/CSS, React and a third party API to give random recipes or when searching for recipes
